

Althaf Hussain Shaik

Java Full Stack Developer | 6+ Years Experience
■ 804-551-4208 | ✉ althafjava0992@gmail.com | Virginia, USA | LinkedIn Profile

PROFILE

Highly experienced Java Full Stack Developer with 6+ years specializing in building scalable, resilient, and cloud-native applications. Proficient in Java (8/11/17), Spring Boot, Microservices, and full-stack development using React/Angular and TypeScript. Proven ability to leverage AWS services (Lambda, EC2, S3) and modern DevOps practices (CI/CD, Docker, Kubernetes) to deliver high-performance, secure, and production-ready enterprise solutions.

SKILLS

- **Backend & Core Java:** Java 8/11/17, Spring Boot, Spring MVC, Microservices, RESTful APIs, Feign Clients, Kafka, Servlets, JDBC, JVM Optimization
 - **Persistence & Caching:** JPA/Hibernate, PostgreSQL, Oracle, MySQL, MongoDB, Redis, SQL Query Optimization
 - **Frontend & UI:** React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Redux/State Management
 - **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, API Gateway, IAM, CloudWatch, SNS, SQS, VPC, Secrets Manager), Docker, Kubernetes, Jenkins, Maven, Gradle, Git, CI/CD
 - **Security & Testing:** Spring Security, JWT, OAuth2, Postman, JUnit, Mockito, TestNG, Agile/Scrum
-

PROFESSIONAL EXPERIENCE

Java Full Stack Developer, Galaxy3Corp | Aug 2024 – Present | Virginia, USA

- Designed and developed high-throughput Java Spring Boot microservices using modular architecture supporting 5000+ RPS.
- Built secure React + TypeScript frontend modules improving performance by 35%.
- Implemented AWS Lambda, S3 triggers, IAM roles reducing backend manual work by 40%.
- Optimized JVM GC and multithreading reducing API latency by 28%.
- Enhanced CI/CD using Jenkins, Docker, Kubernetes enabling zero-downtime deployments.

Java Full Stack Developer, VCloud Technology Group LLC | Dec 2023 – Aug 2024 | Virginia, USA

- Designed event-driven microservices using AWS SNS/SQS for async workflows.
- Developed reusable Angular/React components reducing redundant API calls by 20%.
- Implemented Spring Security + JWT achieving 100% security audit compliance.

- Leveraged Redis caching reducing DB reads by 60% and boosting throughput.
- Automated infra provisioning with CloudFormation + Secrets Manager.

Java Full Stack Developer, Techno9 Solutions INC | Feb 2020 – Sep 2022 | Virginia, USA

- Modernized legacy JBoss/Oracle systems into Spring Boot microservices on AWS EC2/RDS.
 - Implemented AWS S3, SNS/SQS pipelines enabling distributed processing.
 - Maintained 90%+ code coverage using JUnit & Mockito.
 - Built Jenkins CI/CD pipelines with automated testing and blue/green deployments.
-

EDUCATION

- Master's in Information Technology (Jan 2018 – May 2020)
- Master's in Software Engineering (Aug 2015 – Dec 2016)
